PROFESSIONAL SUMMARY

Strategic Full Stack Engineer with 10 years of experience in architecting scalable enterprise applications using Angular (v2-v21), Node.js, and Python. Expert in Microservices architecture, RESTful APIs, and containerization with Docker. Spearheaded the implementation of TDD across three critical microservices, reducing production bug reports by 46% and increasing code coverage to 90%+.

PROFESSIONAL EXPERIENCE

NAGARRO

Associate Staff Engineer

May 2022 – Present

Gurugram, India

- Lead end-to-end technical tracks for high-performance web applications using Angular, React, and Python.
- Architected a distributed frontend using Micro-frontends and Nx Monorepos, improving code reusability and reducing build times by 40%.
- Established TDD and coding best practices, resulting in a 30% reduction in production incidents.
- Designed and supported maintainable RESTful APIs and services integrated with AWS, GCP, and Azure cloud platforms.
- Managed source code control via GitHub and automated deployment through optimized CI/CD pipelines, cutting manual deployment overhead by around 9 hours per week while establishing automated quality gates.
- Mentored and coached 5 junior and mid-level engineers through structured code reviews and architecture sessions, accelerating feature delivery velocity and reducing post-release defects by 5%.

ACCENTURE

Senior Software Analyst

Nov 2021 – May 2022

Gurugram, India

- Designed enterprise web solutions with a focus on Microservices and continuous delivery.
- Developed 40+ reusable UI components and core services, reducing front-end development time by 35% across product suites.
- Translated UI designs and legacy app to React SPA ensuring scalability and improving code reusability by 30%.

FLIXSTOCK

Senior Software Engineer

Nov 2018 – Nov 2021

Gurugram, India

- Engineered SPAs and PWAs using Angular, Electron, Node.js, and Python, increasing organizational productivity by 60%.
- Developed complex image-processing applications, and Apps to support AI integration.
- Worked on building Workflow Manager for creating and managing the workflows to AI servers to automate, track job distribution for Image editing and quality control enhancing editor efficiency by 50%.

FRETRON LLP

Software Developer

May 2017 – Oct 2018

Gurugram, India

- Built a real-time logistics tracking system using Angular, Node.js, GCP, Kafka and PWA technologies, enabling trucking managers to live track vehicles by cutting down manual information and increasing throughput by 45%.
- Used SQL and NoSQL databases to store data and monitored system performance using Grafana and configured NewRelic Dashboard and heatmap to enhance user interactivity by 40%.

CJ DARCL LOGISTICS

Software Developer

May 2016 – Apr 2017

Gurugram, India

- Pioneered a real-time logistics partner app built with Angular, Node.js, and PWA, standardizing data entry and serving 500+ new partner profiles weekly.
- Managed data with MSSQL databases and tracked system performance using Grafana.

TOOLS AND TECHNICAL SKILLS

Programming Skills:

TypeScript, JavaScript (ES6+), Python, HTML5, CSS3, SCSS

Frontend Tech: Angular (2-21), React, Redux, NgRx, RxJS, Next.js, Micro-frontends, Nx Monorepos

Backend Tech: Node.js, Express.js, FastAPI, Django

Cloud Platforms: AWS, Microsoft Azure, Google Cloud Platform (GCP), Firebase

Databases: MongoDB, PostgreSQL, SQL Server, Redis

DevOps & Infra: Docker, Kubernetes, Jenkins, GitHub Actions, Azure DevOps, CI/CD Pipelines

Messaging/Streaming: Kafka, RabbitMQ, Socket.IO

Architecture: Microservices, Distributed Systems, Event-Driven Architecture, REST APIs, Domain-Driven Design (DDD)

AI & Emerging Tech: LLMs, LangChain, Prompt Engineering, RAG, Vector Databases, Semantic Search, AI-Assisted Development

Testing & Quality: Jest, Jasmine, Mocha, TDD, Unit Testing, Integration Testing

Methodologies: Agile, Scrum, Kanban, SDLC, Design Patterns, SOLID Principles

Data Engineering: NumPy, Pandas, SciKitLearn, Matplotlib

EDUCATION

MS in Data Science Liverpool John Moores University	2020 – 2022
B.Tech in Computer Science Dr. APJ Abdul Kalam University	2011 – 2015

LEADERSHIP & ACHIEVEMENTS

- Led technical tracks for multiple enterprise-scale digital transformation programs.
- Reduced production incidents by 30% through solutioning and TDD adoption.
- Improved build performance by 40% through Micro-frontend and Nx Monorepo architecture.
- Increased work productivity through AI-assisted development workflows.
- Mentored junior and mid-level colleagues, reducing production defects by 35%.
- Strong understanding of engineering principles, best practices, and established reusable architecture patterns adopted across multiple teams.
- Excellent communication and stakeholder collaboration skills.
- **AI Implementation Research:** Actively researching the integration of LLMs and LangChain into MEAN stack architectures.

CERTIFICATIONS

- Nagarro Certified Scrum Master V3
- AI In SDLC - 101 For Builders
- Agile For Developers
- UX For All
- Azure Cloud Certified From Nagarro
